PERSONAL PROJECT

ProblemHub

A user-friendly web-app designed to help you store, organize, and access all your **notes** in one convenient place **(digital note-taking)**.

EDUCATION

Bachelor of Technology- Electronics and Communication

JSS Academy of Technical Education, Noida

📅 June - 2014 - June - 2018

ACHIEVEMENTS

- Texas Instruments Quiz Winner.
- Winner of Zoom Marathon Challenge held by MASAI.
- Bucket 1 Appraisal rating for FY 2021-2022.

EXPERIENCE

TechAhead pvt Ltd 📅 July - 2023 - Ongoing

TNCC

- Working as a **MERN** stack developer on **TNCC**, an e-learning platform focused on delivering interactive and engaging educational experiences for students worldwide.
- Implemented authentication and authorization systems using protocols such as **OAuth** and **JWT** and also worked on role-based access control (**RBAC**) system.
- Integrated real-time chat functionality with **socket.io**, facilitating seamless communication among Students and Instructors.
- Used **Redux/Redux-Saga** for state management and **redux-persist** for caching.
- Developed **file upload** functionality, integrated audio/video players, implemented pagination, **lazy loading**, and integrated **chart libraries** for data visualization.

Ekaasha Technologies 📅 June - 2021 - July -2023

Daily Shop

- Working as a MERN stack developer on **Daily Shop**, an e-commerce website focused on enhancing online sales and customer engagement.
- Created **REST APIs** using Express.js, enabling seamless communication between the front-end and back-end systems of the application.
- Built **reusable and customized** React components for tables, drop downs, popups and custom hooks for various use case.
- Integrated **Redux** for state management and **React Router** for dynamic navigation, ensuring a smooth and consistent user experience.

NandiSewa

- Developed **NandiSewa** from scratch, a React based web application aimed at collecting charity to provide food, shelter and medical assistance to street and disowned cows.
- Contributed to the development and improvement of the **dashboard** and **admin** panel to enhance user management functionalities and streamlining administrative tasks.
- Implemented **lazy loading** to load different modules, made **configurable** React components, common loader and **central network layer** for api calls.
- Integrated **Razorpay** as the payment gateway for seamless and secure online transactions.
